

6 Stages Of Data Analysis

Simplified with an example

-By Younus Chilakala

Analysis during
DINNER PREP

ASK/PLAN

Ask family members about their opinion for preparing a dish for dinner.

Plan according to their inputs!

PREPARE

With the planning done, get ready to **prepare by looking for the suitable ingredients.**

It is always important to make sure to have the items else its back to the ask process!

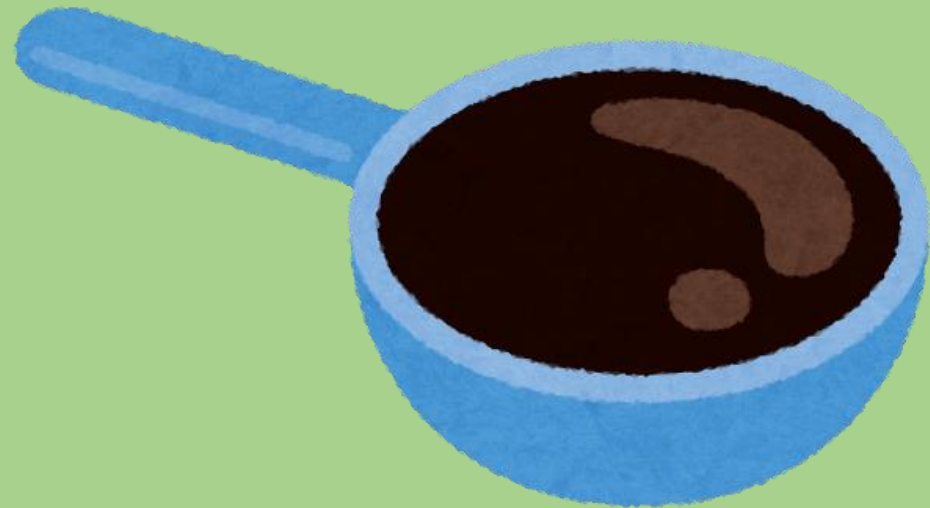

PROCESS

Once it is confirmed that all ingredients are stocked, it is time to **process** through them to choose the quantities needed for the dish.

ANALYZE

Check for taste while cooking
for **analysis** and prepare with the
suitable recipe and then taste test
one last time to add any missing seasoning.

SHARE

Set the table and portion out the dish for all your family members and get them to **share** their inputs after the meal.

ACT

Take suitable steps for the next time preparation of the dish while noting the response or feedback of the family members and **act** accordingly!

Good job!

THANK
YOU
